Congratulations on the best presentation I have heard on circumcision. **The late Jeannine Parvati Baker, author of "Conscious Conception", "Hygieia, A Woman's Herbal" and "Prenatal Yoga"** Ending infant circumcision, and helping men recover from its devastating, but often unnoticed effects, is one of the most important public health issues of the English-speaking world. Deva Daricha is one of the leading Australian authorities addressing circumcision healing. **John W. Travis, MD, MPH Preventive Medicine, Author of Wellness Workbook, Cofounder of The Alliance for Transforming the Lives of Children** Over 18 years ago I began to investigate the phenomena of body memory in adult males of male infant circumcision.

Years ago I wrote about it like this:

One night after my wife, Rachana and I had been loving, I was lying next to her and I said, "I'm feeling really weird. I'm starting to feel really little." She said, "Just allow yourself to feel that way." OK, so it was safe to feel. I started to spiral down until I was feeling very, very young. My consciousness started to follow that

pattern of going back, back, back, and then all of a sudden I felt a violent searing pain around the edge of my penis. Bingo! I was right back in circumcision trauma. Right back with the memory of my penis being circumcised. That memory is there, embedded in the tissue, with every man who's ever been circumcised.

My sense of the structure of it is this: a boy child is born, open and looking to connect with the mother, to be protected, nurtured, and nourished, to be enfolded in the way that he has been for nine months. At some point there the child is taken away from the mother and circumcision happens. So what impinges into the male child's consciousness is that, "the mother has let this happen to me, she has been party to the pain", and then an anger develops that is structurally held in that scar.

This e-book is the culmination of that investigation and contains much new information on the lifelong impact of the circumcision act.

It also shows hope because much of the damage can be healed using cautious, sensitive techniques.

This work contains a general context for understanding how some cultures became circumcising societies as well as 10 case studies of the process of healing the damage.

1. **Why** did circumcision emerge in Anglo Saxon, Jewish and Muslim societies? Consider the answers.
2. **Discover** Charles Kellogg's (the founder of Kellogg's Cornflakes) role in promoting circumcision.
3. **Understand** the role and function of cellular memory and how the impact of circumcision surgery continues to live on in the body's memory.
4. **Read** a unique account of how to release circumcision trauma from the body.
5. **Consider** the outcomes of producing pain in the body's main organ of pleasure.
6. **Follow** 10 comprehensive accounts of the healing of circumcision trauma in adult males.
7. **Learn** extended techniques for the healing of circumcision trauma in adult males.
8. **Learn** to bring peace to the distressed parts of the body.
9. **Become familiar** with the need for creating a gentle and safe context where this healing can happen.
10. **Read** a surprising account of the social impact of circumcision on the relation between men and women.
11. **Find out** how circumcision disrupts the mother- baby bond.
12. **Acquaint** yourself with the need to create a safe and gentle context where this healing can happen.

As well as the 84 page e-book, there is a **gift** of a one hour's audio presentation entitled "**Healing Circumcision**" which received a standing ovation at the Global Inspiration Conference in Brisbane in 2003.

Additionally included **free of charge and at no extra cost**, as part of this package **Chapter 1** of our book "**The Tantric Path**"• that outlines how body memory functions and how it surfaces in our sexual life.

We want this material and the healing techniques to become widely known. When it was available in hard copy the book and CD set was US\$35.

Now we have included the chapter from the Tantra book as well and slashed the price to US\$16.50.

Having experienced the process described in this book, **Jim Morningstar** of Transformations USA wrote,

This felt like a giant step to recovery of my whole self, a missing piece dealt with very little in most of the recovery work I have studied and experienced over the last 30 years. Healing circumcision is healing the deepest planetary attitudes of separation from the ecstasy of being fully balanced and alive men and women.

What changes does the process of healing circumcision bring? Below are some of the comments from men who have explored this deep level of healing.

The Changes

After the session I felt like I had more available space in my genitals, that I had cleared darker energies out from around my penis and particularly around the scar of the old operation.

It's not actually a scar as such but is the scene of the crime all those years ago. I feel the journey is not over yet and there are more layers of this onion to peel but the journey is well and truly begun. I feel lighter around my penis, balls and anus and I've noticed that during lovemaking I am having more intense orgasms and that my energy is somehow more available and more fluid in travelling from this area up and around my body. The itching and mild red rashes have also largely stopped.

Tony P. age 48

Since the healing, (3 weeks as I write), I have noticed myself to be more soft and open-hearted in relating with my partner. She has also observed the difference in the way I relate. **Len Age 36**

In the process I felt hurt towards my mother as I saw visions of her, for allowing this circumcision, and I felt anger towards other females and I saw how that had manifested in my relationships with women. In the process I was able to forgive my mother for her involvement in the circumcision.

I feel the process has offered me a great shift in my body and my life. I am not sure in which way this has occurred as yet.

Writing this right now, I remember that my partner and I shared a very intimate love making session about a week ago. It was a very intimate moment and I feel that I trusted her on another level outside of my consciousness at that time. I feel more comfortable about being nude, and about my penis.

Terry age 32

Since the session I certainly have a different awareness around my penis. It is hard to articulate it seems that I have reconnected to its innocence. Perhaps it has reconnected to its pre-circumcision state of innocence and it is that which I am experiencing.

I can positively say that the act of cutting my genitals at birth has profoundly influenced the way I have acted, felt and related to the world and its people.

Healing the trauma that was locked into my organic body, has and will continue to change my life dramatically. I masturbate with more gentleness and respect for my penis and enter the space of lovemaking with a softer, more open energy. Undoubtedly the greatest blessing of all, was even though my mother died over 16 years ago, I can actually feel her love and presence inside me now.

I feel only joy and relief that the traumatic memory of circumcision can be released from the body and healed.

Jack Age 40

This process was so real and profound. I was dubious at first but afterwards I felt blessed, it was truly amazing. Circumcision is trauma; I do not recommend being a victim. No boy of mine would be subjected to this barbaric act.

Harold age 34

These comments are portions of extensive reports on the healing circumcision process.

The package contains:
